Information on the art – scientific research symposium:

A) “Foundations of Visual Education in the Process of Professional Transition”

B) International Exhibition of art work during the Conference and within the Conference framework

A) Purpose of the art-research symposium

The symposium is a novelty in dealing with the current issues in the domain of professional content relating visual art. The aims of the symposium are practical and theoretical rethinking of the profession which refers to empirical and intellectual plans at all levels of the educational system, development of methodological, pedagogical and didactic standards influenced by adopted, tested, current methodological approaches. Considering that we are living in a world dominated by the visual – photography, posters, design, television, internet, mobile electronic devices which comprises of multimedia and art – the individual loses critical awareness by submitting to the visual jungle market and thus obscuring the horizons on which the knowledge society is founded. Therefore, the synthesis of knowledge and the aspiration to sensitize people for critical relationship towards visual content is defined by the “transition” phase which cannot neglect the basic principles of visual education so as to clearly determine the cultural vision of man and his creative abilities. The professional – art research symposium in its form is conveying the theoretical and practical, giving more transparent insight into the foundations of visual literacy.

The symposium invites artists, researchers, professors, undergraduate and graduate master and doctoral students and other members of the academia.

Performances and work presented at the Symposium will be published in the *Conference Proceedings*.
